

## PROOF OF PERFORMANCE

# Mobil SHC™

## Mobil Gargoyle Arctic SHC 226 saved \$ 140,000 in a period of three years at the refrigeration compressors\*

### A Brewery Poland

#### Objective

To document the superior overall performance of Mobil Gargoyle Arctic SHC 226 with respect to the previous product, which is a mineral refrigeration compressor oil from a competitor.

#### Situation

A major brewery in Poland has 15 Sabroe refrigeration (ammonia) screw & piston compressors Types SAB 202 ;163HM, HR & SMC 106; 112 and MYCOM N200 used for the cooling process in beer production. Total oil capacity is 2200 lt. The drain interval with existing mineral oil is twice a year. There are oil oxidation and degradation issues observed (viscosity increase, sludges, deposits).

#### Solution & Results

Use of Mobil Gargoyle Arctic SHC 226 brings outstanding results following the switch of the lubricant. Extended oil drain intervals are now every 11,000 hrs (or every 3 years), resulting in reduced drain and separator costs, waste oil costs, reduced deposit formation and lower compressor maintenance costs.

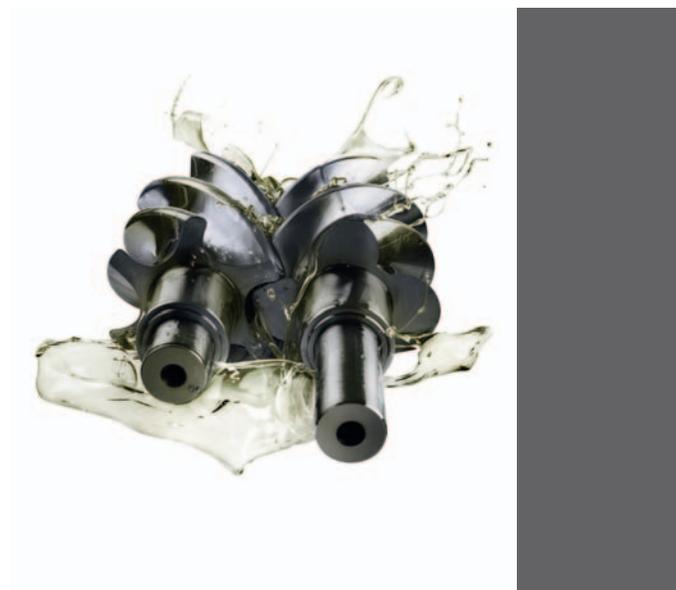

#### Benefits

Extended oil drain intervals (by 6 times), reduced waste oil.

Reduced separator costs.

Savings on maintenance cost and cleaning.

The benefits listed above represent a saving of \$ 140,000 in a period of three years.
